

LexisNexis® Enterprise Solutions Training courses

LexisNexis® Enterprise Solutions

Training Course Options

The Enterprise Solutions consultancy team offers a comprehensive range of training services.

We work to blend our training options to meet your learning and development requirements in the most cost-effective and flexible way.

Classroom Based Training

Where training is delivered to a fixed syllabus, over a set duration, with a clear objective, prerequisites and delegate profile. These courses are normally scheduled to be run at client offices but some can be conducted from LexisNexis offices if preferred.

Upon completion, competency tests are undertaken by delegates, and appraisals of both the training course delegates and trainer are completed.

Public Courses

These are publicly scheduled, Classroom Based Training courses delivered at a LexisNexis office. These public sessions contain the same content and competency assessments that are used in the Classroom Based Training courses.

Super-User/Train the Trainer Training

These are in-depth, one to one or small group training sessions designed for those users who will be acting as LexisNexis application super-users or in-house trainers. Covering all core content, functionality, navigation techniques, service customisation and delivery options, this type of training is designed to ensure complete user confidence and competence in using our services.

Bespoke Training

LexisNexis offer clients the option to create a completely bespoke training course.

This can be based on either the standard training course outlines with some changed elements, or built completely from scratch.

Wherever bespoke training is required it is essential that the consultant engages with the client to agree the course content and delivery format prior to commencement.

Skills Transfer

Client education support can be delivered in a more flexible format to a mutually agreed agenda. The consultancy is based on a hands-on approach where our consultants will work with you to provide a solution determined by your individual needs.

Typical examples of this are: design and development of reports, and deep technical education on application functionality.

These options can be discussed with your Account Manager or one of our Training Consultants to establish which are most appropriate.
