

New release delivers enhanced user experience

Lexis® Visualfiles® 2014

Lexis Visualfiles 2014 from LexisNexis Enterprise Solutions is an exciting new chapter for the UK's leading legal workflow and case management system. This new release delivers an improved user experience through a redesigned interface and establishes an architectural foundation for the next generation of Visualfiles functionality.

Visualfiles 2014 Benefits

- For users, **Visualfiles 2014** is intuitive and works the way they expect. As an evolution of previous Visualfiles versions, it's easy to learn and quick to use. Simple improvements allow them to work even more easily, making more time available to dedicate to clients.
- For IT, **Visualfiles 2014** is a simple upgrade to the market leading workflow system, protecting your existing investment at virtually no risk. As the strategic workflow platform, **Visualfiles 2014** supports the use of industry standard development tools alongside traditional Visualfiles skills.
- For the business, **Visualfiles 2014** delivers a modern workflow system into your firm at a very low financial and resource cost of upgrading from earlier versions. The technical and learning overheads have been minimised so that partners and staff can quickly benefit from the system to help them be even more efficient and effective.

Enhanced User Experience to Work the Way You Expect

The new release offers significant enhancements to the overall user experience, introducing a modern, intuitive Microsoft-style experience for the Visualfiles Desktop, To-Do List, Finder, Document Review, Time Items and related system areas.

Some of the highlights of **Visualfiles 2014** that will help user adoption and productivity include:

- **Work the way you expect:** A familiar Microsoft Office look and feel, with a choice of themes.
- **Intuitive navigation:** Selecting a function from the navigation panel presents information in the workspace and provides the relevant shortcuts and filters. Functions include Desktop, To Do List, Finder, Document Review, Time Items, Data Extract, Time Sheets, Document Import and Web. Keyboard navigation is available for accessibility and fast navigation for volume users.
- **Context sensitive ribbon bars:** Shortcut keys now provide quick access to key functionality such as the ability to filter lists by 'Today', 'Yesterday', 'Tomorrow', 'This Week', 'This Month' or 'This Year'.
- **Tailor to your way of working:** Within each function, hide or minimise ribbons and panels to suit your way of working. You can easily drag and drop columns to sort and group information in the workspace to help you prioritise tasks and activities.
- **See documents at a glance:** Help files, Comments or Document Previews* are easier to see in a docking panel on the right hand side of the screen, which can also be hidden or set as a floating panel.
- **Find what you need faster:** A simplified Finder facility makes searching for files, entities and documents* easier by providing three levels of filtering to help you quickly find what you need.
- **Access external information quickly:** Quick links to internal or external websites are now shown within their own workspace to enable easy access to additional information.
- **Tailor 'Help' to your system:** In addition to displaying Help in an easy-to-view docking panel, **Visualfiles 2014** introduces a Help file for the new screens available in WebHelp (HTML) format that you can tailor for your particular system to enhance support for users.

A Platform for the Future

Visualfiles 2014 is the foundation for all future development activity. LexisNexis is committed to investing in Visualfiles to continue to lead the way in legal workflow and case management. Our vision is to deliver a core technology that enables clients and partners to rapidly develop solutions to support their business evolution; a 'built on Visualfiles' future focused on key areas:

- **Users:** Providing modern user interfaces that support delivery from desktop, web browser, tablet or smartphone.
- **Management:** Improving access to data and information to support effective business decisions.
- **Developers:** Enhancing flexible development capabilities to support the adoption, integration and development of Visualfiles by personnel with traditional Visualfiles or industry-standard technical skillsets.
- **Integration with LexisOne™,** LexisNexis' enterprise-grade business management system powered by Microsoft® Dynamics® AX.
