Lexis® InterAction® Mobility

InterAction Mobility is a significant addition to the InterAction solution suite. Designed to provide all professional users with an easy to use tool to access InterAction Relationship Intelligence anytime, anywhere via their mobile device.

Maximise productivity

InterAction Mobility provides mobile access to client relationship information resulting in higher productivity and improved client service. Whether planning for a meeting on a train or needing to make connections at an event, professionals can check for mutual relationships or research past contact histories, notes, meetings or emails for that client or prospect.

Making calls, sending emails and texts straight from InterAction saves professionals time - they can even use Mobility to check the exact location of their client offices while on the road.

Mobility also helps firms gain more return on investment through the increased usage of InterAction. Easy mobile access to data encourages professionals to leverage intelligence on their contacts and provides a familiar interface to ensure user adoption. In addition, professionals will have Client information anytime anywhere more information at their fingertips to deliver a better service to their clients or to understand more about their prospects.

- **Find Contacts -** View any firm contact from your mobile, even if they're not in Outlook
- **Identify Relationships -** Identify mutual contacts between clients, you or your colleagues
- **Discover Opportunities -** Follow contact and correspondence threads through people & companies
- **Prepare for Meetings -** Review past emails, meetings, notes and contact relationships
- **Connect -** Instantly make phone calls, send texts or emails from the contact record on your mobile
- **Save Time -** Find the information you need immediately without calls to the office and delays

Get access via the latest devices

Lookup the contact you're about to meet

Who else is talking to my client and about what?

Minimal IT overhead, maximum flexibility

An innovative browser-based cloud application, providing maximum flexibility of deployment across mobile devices - Android, Blackberry, iPhone, iPad. InterAction Mobility requires almost no management by the IT department. The firm's existing InterAction installation simply connects to the Mobility service via the internet.

Easy to deploy with a simple set up and minimal overheads, InterAction Mobility enables firms to quickly and securely deliver the solution to the firm's professionals. Product updates are handled centrally, enabling users to benefit from enhancements immediately.

Maximum security with convenience

InterAction Mobility is designed to keep your organisation's sensitive InterAction client data secure. No contact data is stored on the mobile device or in the cloud - data remains on the InterAction server behind the firm's firewall and is viewed through a secure and encrypted tunnel.

System Requirements

Please consult either the InterAction Mobility User's Guide or Installing and Configuring InterAction Mobility for accurate up-to-date information on system requirements as well as devices and environments supported by InterAction Mobility.

InterAction Mobility may also work on other devices and operating systems, but those configurations have not been fully tested and are not fully supported.
